

tiaré  
it's all around You

From the beginning we had only one idea:  
to design a boat, which was elegant, sturdy, and tailored to the needs of  
those who enjoy five-star service and luxury.

A boat less "attentive" to these concepts would require far less construction time and less money but we believe we have made the right choice about the future of Tiaré therefore creating a solid foundation for its long-term reliability.

All our choices are born from a careful assessment of the needs of our guest divers and non divers. All indoor and outdoor living areas, decks, cabins are in antique teak salvaged from old Yoglo no longer used. Wonderful pieces of "real Indonesia" recovered to tell their story

# Tiaré Destinations

Komodo, Raja Ampat, Triton Bay, Halmahera, Flores to Alor & Banda Sea, Forgotten Island

We work with only the best scuba divers to ensure that you spend a hassle-free holiday diving. Our goal is to meet your needs as a diver as well as a guest on our luxury cruise.

We aim to build lasting relationships with you and also allow you to bond with your diving buddies by providing the highest quality services.

We believe our cruise destinations speak for themselves, browse our most recent projects below.

Indonesia diving cruises are unforgettable. In our opinion, and after 20 years of diving experience, Indonesia is the world's best country for sea life and has more marine diversity than anywhere on earth. In the middle of the 'Coral Triangle' that extends from Australia to the Philippines and from Borneo to the South Pacific, this country is the ocean's heart, where, due to the Wallacea, the marine variety suggests when life in the sea began.

While sailing on Tiaré you can experience all the amazing fish and all marine life in these nutrient-rich seas, encounter big pelagics around the cool waters of Komodo, drift over colourful fields of coral in Raja Ampat, be astonished at the enormous school of fish in the Banda Islands and shoot the bizarre creatures around Moloku islands.

Raja Ampat cruises allow you to explore the most biodiverse waters on the planet, breath-taking panorama, diving pristine, remote and sometime unknown sites with all the comforts of a luxury liveaboard safari. Komodo is a prime destination; plenty of fish action, as well as the promise of mantas, sharks and more, plus of course a trekking to Komodo National Park with a ranger to see Komodo dragons or, better, to meet wild dragon along a Rinca shore (very impressive). Some trips will take you further afield to places like Cenderawasih Bay to see whalesharks or Triton Bay in West Papua, Forgotten Island in Banda sea for hammerhead, where boats are few and only genuine pleasure-seeking divers are to be found. Fantastic times are assured. Its not a question of only diving.... we like to meet local people too!

Its not a question of only diving.... we like to meet local people too!

You will meet new people from different cultures and classes not only onboard the Tiaré but we want you to experience some of the real Indonesia. Not easily accessible while staying in the more touristic areas.

## Komodo National Park

Have you ever wondered what it would be like to be face to face with a dinosaur?

In Komodo your dream can come true. Komodo and Rinca are the only places where we can still find these Komodo Dragons in the wild. These small, brown scorched-earth islands fringed with sandy beaches are lapped by the clear waves of the national park, where you may even see the dragons patrolling the beach or viewing you from a high rocky outcrop.

Below the surface there will be many more wonderful creatures you may have never seen before in your life, like the hobbit worm or a rhynopia, a lady bug or skeleton shrimp.

Komodo is not only famous for its macro life, there is an abundance of fish and corals due to its mineral rich waters. Don't be surprised to see some beautiful pelagic, like sharks or mantas.

The water is not always warm, in fact it can be decidedly cool. The seas are not always calm, the currents can rage but the abundance of pelagics, more critters and interesting macro-action than you could imagine, the dazzling colours and diversity, make scuba diving here truly legendary.

Due to its geographic location, right in between the Indian ocean and the Flores sea in the North, we can expect stronger currents.

### Dive Areas:

Castle Rock, Crystal Rock, Karang Makassar (Manta, Manta, Manta !!!!), Cannibal Rock, The Cauldron, The Shot Gun, Cannibal Rock ...more than 40 diving sites.

### More info:

Water temperature: Water temperature: 19-28°C. Around Southern Komodo and Rinca Islands the water temperature drops drastically 24-21°C, a 5mm long suit is advised and hood and booties are strongly recommended.

**Airport:** Labuan Bajo. International flights reach Bali, then domestic flight to Labuan Bajo.

**Weather:** 27-32°C. Indonesia has two seasons: wet and dry. In most of Indonesia the wet season is from October to April and the dry from May to September. Nusa Tenggara's climate is relatively dry with a light rainy season from November to April.

Time zone: GMT +8.

## Raja Ampat

Explore the islands of the Four Kings, the literal translation of Raja Ampat.

### Dive Areas:

**Cape Kri.** If you want to see large fish and to be enveloped by fish then roll in here, both desires will soon be satisfied. Groupers, sharks, snappers, Napoleon wrasse, barracuda, dogtooth tuna, trevallies. They are all here in numbers.

Cape Kri is a great place to spot wobbegongs, the curious carpet shark, but you should also admire gorgonian fans to look for pygmy seahorses grasping its branches.

**Misol Island.** Is located in the southern part of the Raja Ampat area and is home to an astonishingly colourful reef-scene. Soft corals dress up slopes, walls and canyons in a colourful palette. No big schools here but cuttlefish, pipefish, Indian lionfish, nudibranchs, soft corals and critters. Unmissable by night.

**The Jef Fam Group.** Is in the central region of Raja Ampat, so it's quite probable that you'll visit it whether we are joining a southern or northern cruise route. It's quite a large area with some impressive cabbage corals, sheet corals and mushroom corals. What makes Jef Fam special is its diversity of marine encounters and is the best place to find wobbegongs. You can also see huge giant clams, Spanish mackerel, great barracuda and manta rays.

**Manta Ridge.** Is one of the best dive spots in Raja Ampat to regularly see mantas in impressive numbers, it is a popular central site, thanks to a cleaning station which delivers some awesome manta ray action to the few lucky enough to be there. In current, you may have to hook into place before enjoying the show which includes some black mantas, bumphead, parrotfish and turtles all unconcerned by the audience.

Your memories of diving in Raja Ampat will stay with you forever.

The myth goes that each King reigns over one of four main islands, Misool, Salawati, Batanta, and Waigeo.

For the lucky few Raja Ampat is not one of the most frequently visited scuba diving areas but can surely be nowhere better on earth. The highest marine diversity on the planet, beautiful topside scenery and awesome underwater topography, makes Raja Ampat islands the closest place to heaven.

To stand on the bow of your liveaboard sailing towards lush islands, inhabited by people whose lives are so different, really gives you the unbelievable feeling of freedom.

There are a great variety of environments to cater for every diver's taste and level: from wall to slopes, caves and canyons, seamounts, much diving, wrecks.

The experience of diving the reef and the Raja Ampat islands surpasses the expectations of the most seasoned diver and underwater photographer, as well as the beginners. There are more than 1500 smaller islands covering over 50,000 sq km. To see it all in one trip is impossible as there are thousands of possible dive sites. Exploration of this immense wonderful area is still continuing.

### More info:

Water temperature: 27-30°C. A 3mm shorty should be sufficient. If you feel the cold a 5mm shorty is advisable. Length of stay: Recommended 10-16 days cruise.

Airport: Sorong. International flight to Jakarta or Manado and then domestic flight to Sorong.

Time zone: GMT +9.

## Triton Bay

Explore the Enchanting Triton Bay.

Embark on an extraordinary diving adventure in the remote wonderland of Triton Bay, West Papua, Indonesia. This hidden gem is renowned for its untouched beauty, unparalleled marine biodiversity, and the thrill of swimming with majestic whale sharks. Triton Bay remains a true frontier destination, untouched by development and awaiting intrepid explorers like you.

### Highlights:

**Vibrant Soft Corals:** Dive into a kaleidoscope of colors as Triton Bay's unique underwater habitats showcase an array of colorful soft corals. The vibrant marine life thrives in these nutrient-rich waters, providing a thrilling dive experience unlike any other.

**Unveil Endemic Treasures:** Encounter the captivating Nursalim flasher wrasse, graceful wobbegong and walking sharks, and other marine wonders in Triton Bay's living time capsule of biological diversity.

**Diverse Underwater Landscapes:** Explore breathtaking landscapes, from cascades of boulders to dramatic overhangs, caverns, and sheltered bays. The diverse underwater scenery mirrors the rich biodiversity thriving in this untouched marine sanctuary.

### Dive Areas:

**Triton's Playground:** Swim with schools of barracuda and trevallies amid submerged pinnacles and steep walls adorned with large sea fans and sponges, ideal for underwater photography.

**Namatota:** Explore a unique dive site with submerged caves, where intriguing stalactites and sleeping reef sharks or resting turtles may be found.

**Little Komodo:** Experience rocky outcrops reminiscent of Komodo Island, observing schools of fusiliers, snappers, and occasionally graceful manta rays.

### Diving with Whale Sharks in Triton Bay:

Swim alongside magnificent whale sharks drawn to local fishing platforms, or 'bagans,' feasting on anchovies and baitfish. Timing your visit during the peak fishing period, marked by the dark of the moon, increases chances of this extraordinary encounter. Curious dolphins may add to the underwater delight around the bagans.

**Water Temperature:** Enjoy warm waters year-round in Triton Bay, with temperatures ranging from 27°C to 30°C (80°F to 86°F), perfect for a tropical diving experience.

Prepare to be captivated by the untouched beauty and unparalleled marine encounters in Triton Bay. Whether you're a seasoned diver or an adventurous beginner, this enchanting frontier diving destination promises a journey of discovery and wonder that will leave a lasting impression.

This tropical paradise, nestled between the Philippines, Sulawesi, and New Guinea, boasts lush forests and serene volcanoes rising from calm seas. With pristine beaches and vibrant coral reefs, it offers exceptional conditions for scuba diving, snorkeling, and more.

Immerse yourself in the extraordinary and diverse world of Halmahera diving. Explore wrecks in Ternate, emerald waters in Tidore, and majestic walls in Bacan. Drift through the beauty of Patinti Strait and be enchanted by its stunning coral gardens.

## Halmahera

Discover the Hidden Treasures of Halmahera.

### Dive Areas:

Many of the dive sites are sea mounts with a rocky substratum, and plenty of large soft coral-covered boomies in all different colors. The fish life is intense: as a Halmahera signature, Blacktip sharks are seen patrolling around on most of the dives. Tunas, Spanish mackerel, giant trevallies, and other pelagic fish are part of the show. Napoleon wrasses, bump head parrotfish, groupers, schools of surgeonfish, and spadefish are also well represented. Other types of dive sites include critters / muck dives and beautiful fringing reefs.

Dive into the wonders of **Shark Mountain**, a submerged island with a thrilling depth of 100 feet. Witness various shark species patrolling its perimeter, alongside Napoleon wrasse and bustling shoals of barracuda.

Be enchanted by **Napo Siko**, hailed as the best wall dive. But fear not, there are many equally beautiful sites yet to be discovered. Spot Hawksbill and green turtles, alongside oceanic whitetips, and blacktip reef sharks. Immerse yourself in the harmonious dance of Napoleon wrasse and the intricate lives of invertebrates sheltering in enormous sponges.

As part of the **Coral Triangle**, Halmahera remains a hidden gem, teeming with rich marine life and extraordinary flora and fauna. Preserved from mass tourism, this remote haven is a favorite for sailors and divers seeking raw, untouched nature and secluded bays.

Experience the magic of **Halmahera** on a liveaboard adventure, where you can relish the beauty of unspoiled landscapes and colorful seascapes.

Join us now to uncover the secrets of one of the best diving destinations – before the world discovers its wonders!

## Flores to Alor

The remote and unspoiled islands of Adunara, Lembata, Pantar and Alor are East of Flores.

They are probably one of Indonesia's best kept diving secrets. From incredible muck dive sites to impressive walls, crystal clear water to black volcanic sand sites, into stronger currents with thousands of reef fish. The Indonesian government has recently agreed to protect the area in order to secure a safe route for migrating cetaceans which pass through the straits on their migration to the feeding grounds in the deep waters of the Banda Sea.

### More info:

Water temperature: 22-28°C. A 3mm shorty should be sufficient for Flores but it can cool down a lot in the Pantar strait; a 5mm shorty is advisable over a 3mm full suit.

Airport: Maumere (MAF). International flight to Jakarta or Bali and then domestic flight to Maumere.

Time zone: GMT +8.

### Dive Areas:

**Adunara Island.** Eastern Flores has some famous dive sites such as Magic Log where ribbon eels and frogfish are common. The very rare weedy scorpionfish (*Rhinopias*) has been found here, as has the wonderpus octopus. There is still a lot of uncharted territory to discover in this region.

**Lembata Island.** Is also well worth diving exploration. Schools of fusiliers, angelfish and many different parrotfish species are common. Gorgonian seafans, host pygmy seahorses. Surrounding seas of Lamalera could also hold cetacean surprises.

**Alor.** Dive spot-names like "The Bullet" give some hints what diving in Alor is like: Big staff and currents, which are sometimes so strong that you have to pay attention. But do not worry; our divemasters know how to adjust the diving to the abilities of their groups. Don't forget we also provide the Enos transmitter for your localization in the unlikely case you miss the group!

As the direction and intensity of the currents changes quite often, you may have had a relaxing dive in the morning and find the same spot in the afternoon resembling a washing machine.

The strait between **Pantar** and Alor acts like a gigantic jet propelling waters from the Flores Sea in the north to the Savu Sea in the south. You will only find similar conditions around Komodo.

## Forgotten Islands & Banda Sea

Is one of our more remote destinations where time seems to stand still.

The Forgotten islands are part of the Maluku Tenggara which is a 1.000 km chain of archipelagos running from East Timor to Western Papua. Undeveloped, distant from population centers and far off any beaten path, these "Forgotten Islands" have been largely isolated from the rest of the world. If you don't like to run into any other liveaboard cruise you could imagine yourself as the only person in the world on one of old trade ships. Then this is the route for you. We will be diving some unexplored reefs. But also visit an area where we have spotted **hammerhead** schooling. Ever seen an active volcano? We can guarantee you an explosion. We like to hang around for the sun to set, so we can see the red hot lava roll down the slope into the water.

We plan four expeditions each year in November/April. One itinerary starts in Maumere (Flores) and ends in Saumlaki, in the Tanimbar Islands, and another trip returns along the same or a similar route. Detailed itineraries in this area may be subject to change according to weather and diving conditions and other factors.

### Dive Areas:

... we have secret dive spots

### More info:

Water temperature: 22-28°C. A 3mm shorty should be sufficient for Ambon but the Banda Sea can cool down a lot a 5mm fullsuit is advisable.

Airport: Saumlaki (SXK) or Tanimbar . International flight to Jakarta or Bali and then domestic flight to Ambon, than Saumlaki. Maumere (MOF)

Time zone: GMT +8.

## Private Charter

Feel the real spirit of Indonesia during our cruises.

Tiaré is a boat for people who like diving, but we want to make not only divers, but their non-diver travel mates happy too. If your partner doesn't want to dive, or doesn't dive, we realize you are always obliged to stay in a resort, both of you miss discovering pristine places.

We want you and your buddy on our boat – you dive and we take care of all those people who like spend time in another way: developing a suntan on the beach, snorkeling along the reef or whatever they wish.

Ikat weaving process at Sikka village – Flores

Dawera Island – Forgotten Island

Saumlaki – Forgotten Island

Aerborek – Raja Ampat

Bontoh village – Flores

Forest Trekking to look for Paradise Bird with a village guide

## What You can Expect on Board Tiaré

Welcome to Tiaré, a luxurious yet traditional Indonesian Phinisi that will take you on a journey of discovery to some of the most stunning diving spots in the world

Experience diving in the rich waters of the Indonesian archipelago and meet people from the many different cultures on the diverse Indonesian islands that you would never have the opportunity to see while staying in more tourist-heavy areas.

Tiaré offers a spectacular experience for divers as well as non-divers, with bright airy cabins, spacious bathrooms and a large front deck where you can socialize, eat under the stars or just relax in the Indonesian sunshine.

There is also a separate diving deck with hot water showers to warm up after a night dive.

All indoor and outdoor living areas, decks, and cabins are made with antique teak salvaged from old Joglos, which not only gives the feel of "real Indonesia", but has helped to reduce the use of Indonesia's disappearing rainforests.

# Living area

Designed to be a space where you feel totally at home with an extra touch of luxury, comfortable couches and tables are the perfect place to socialize and catch up with your fellow divers. If you need to rest, have a nap, read a book or watch a film. A bar stocked with imported wines and a selection of other drinks is a welcome treat after a day of diving and a small cigar store is available for cigar connoisseurs.

As well as comfortable couches, the air-conditioned indoor lounge also has tables where dinner can be served as an alternative to the main deck depending on weather conditions and your preference.

There are also PCs where you can edit photos or videos and also an indoor camera room, which has plenty of room to store your lenses, charges, lights and even your spare cameras.

## Cabins

More like a 5-star hotel than a boat, the six cabins on Tiaré are your home away from home designed with relaxation and the perfect sleep in mind. You'll enjoy soft linens and well thought out lighting and plug placement as well as spacious en-suite bathrooms, hot water showers and environmental friendly body wash and shampoo.

Two triple cabins are spacious enough to accommodate two adults and one child or three adults, with under-bed storage to ensure ease of movement around the cabin. The other four cabins, two twin and two double, accommodate two adults each for a maximum capacity of 14 guests.

With 14 guests on board Tiaré is comfortable and spacious enough for both a social atmosphere and space to relax and enjoy down time in the luxurious cabins.

## Dive deck

We are passionate about diving and we want each diver to have his or her own personalized experience on board Tiaré. Every diver has their own area to set up their equipment. Highly qualified staff is on hand to help set up and transfer your equipment to the waiting tender dive boats and after a dive your wetsuits will be washed and dried for you.

## Bow lounge

We are passionate about diving and we want each diver to have his or her own personalized experience on board Tiaré. Every diver has their own area to set up their equipment. Highly qualified staff is on hand to help set up and transfer your equipment to the waiting tender dive boats and after a dive your wetsuits will be washed and dried for you.

# Special needs

Tiarè is not only a diving boat, she wants to welcome divers and non-divers with open arms and is there for all your needs. We have put our hearts into finding the best crew, services and safety equipment.

We cruise to areas like the Forgotten Islands and south Raja Ampat where it is very difficult to organize supplies, but we jump through any hoops necessary, as impeccable service is a must.
